Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ruumpol [US 4,642,595].

Ruumpol discloses a device for contact-less measurement of distances in multiple directions of an electrically conductive body, wherein the device comprises a plurality of inductive elements [1, 8], wherein at least one of the plurality of inductive elements [1] is placed essentially around the body [10], and wherein the other inductive elements are [8] provided in the vicinity of the at least one inductive element.

Regarding claim 2, Ruumpol discloses the inductive elements are printed coils.

Regarding claim 3, Ruumpol discloses the other inductive elements/coils disposed at different angular positions around the body and the at least one inductive elements/coils disposed around the body.

Regarding claim 4, Ruumpol discloses the high frequency current [AC current] is fed to the at least one inductive elements/coil [1] and an output signal from the other inductive elements/coils [8].

Regarding claim 9, Ruumpol teaches the use of the device in a control handle.

Claim Rejections - 35 USC § 103

Application/Control Number: 10/535,254

Art Unit: 2832

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5-8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ruumpol.

Regarding claims 5-7, the specific coil arrangement and the specific current fed would have been an obvious design consideration based on the intended applications/environment uses.

Regarding claim 8, it would have been obvious to one having ordinary skilled in the art at the time the invention was made to include additional coils around the body for the purpose of improving different angle detection.

Regarding claim 10, the specific use of the device would have been an obvious design consideration for the purpose of providing controlling means for the magnetic bearing.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TUYEN T. NGUYEN whose telephone number is 571-272-1996.

The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, ELVIN ENAD can be reached on 571-272-1990. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
